ON THE MENU TODAY

Cards whose prerequisites are met and whose hardware is free. Coach posts these at orientation.

CLAIMED

A crew has this one. Write their names next to the chip in dry-erase.

DONE

Every “Done when” box is true. Stamp the sheet, log it, file it in the notebook.

IN PROGRESS

Ran out of time. The sheet lives here with a note on the back saying where it stopped, and the next crew picks it up.

DONE & STAMPED

Completed sheets waiting to be taped into the engineering notebook.

Card Completion Log

Team 22257 · 2026–2027 · one line per card finished. Keep this in the front of the DONE folder.

DATE	CARD	WHO WORKED ON IT	HANDED OFF TO	STAMPED	NOTES

A stamped card is a notebook entry. It already carries the checklist, what the crew did, their names and the date. Log it here, then tape it into the engineering notebook — that is most of EP-5 done for free. Only stamp when every “Done when” box is genuinely true; a card that ran out of time goes in IN PROGRESS instead.
